

LIGATION SYSTEMS

In 1963, Weck redefined the closure market with the introduction of the Hemoclip® Traditional Metal Ligating Clip. Over the last fifty years, the Weck Brand has continued to refine the science of closure to produce a comprehensive line of metal and polymer ligation solutions demanded by surgeons around the world. Whether you prefer the classic feel of metal clips, or the modern flexibility of polymer, Teleflex® offers ligation products designed to suit your distinct preferences and case needs.

**WECK® HEM-O-LOK® POLYMER LIGATION SYSTEM - CLIPS**

Weck® Hem-o-lok® Non-absorbable Polymer Locking Clips provide cool secure ligation; clip locks onto the vessel. The Weck® Hem-o-lok® system is available in a range of clip sizes Medium, Medium-Large, Large and Extra-Large. The Non-Absorbable polymer clip is inert, nonconductive, radiolucent, and does not interfere with CT or X-ray diagnostics.

**WECK® HEM-O-LOK® POLYMER LIGATION SYSTEM - APPLIERS**

The Weck® Hem-o-lok® Closure System's unique design and flexible hinge keep the clip firmly seated in applicator jaws. The clip's distinct tactile feedback confirms jaw seating and secure vessel placement. *Weck® Hem-o-lok® applicators have been designed for exclusive use with Weck® Hem-o-lok® ligating clips.*

**WECK® HEM-O-LOK® POLYMER LIGATION SYSTEM - AUTOMATIC**

The Weck® Hem-o-lok® Auto Endo5® delivers 15 true Medium-Large clips on a 5mm platform. The Medium-Large clip is designed for 3-10 mm size vessels. Designed for security, the non-absorbable locking polymer clip is inert, nonconductive, radiolucent, and does not interfere with CT or X-ray diagnostics.

**HORIZON™ METAL LIGATION SYSTEM - CLIPS**

The preformed chevron shape of the Horizon™ Clip engulfs tissue with precise tip-to-tip closure. Heartshaped Titanium wire is designed to give each clip a firm grip on vessels, while the triangulated cross-section of the clip leg maximizes surface-to-surface contact between clip and jaw, practically eliminating clip fallout.

**HORIZON™ METAL LIGATION SYSTEM - APPLIERS**

Our high quality, hand-crafted reusable applicators are designed to give surgeons solid tactile feedback upon clip closure. Applicator color coding matches the color of the ligating clip cartridge with which it is to be used. Horizon™ applicators are available to meet manual ligation needs for both open surgical applications and laparoscopic needs. *Horizon™ applicators have been designed for exclusive use with Horizon™ ligating clips.*

**HEMOCLIP® METAL LIGATION SYSTEM - CLIPS**

Hemoclip® is synonymous with classic metal ligation. Weck provide two options under the Hemoclip® portfolio, friction-fit and easy load to meet all surgical preferences.

HEMOCLIP® METAL LIGATION SYSTEM - APPLIERS

Hemoclip® Appliers are available in a wide variety of jaw types and applier lengths. Applier color coding matches the color of the ligating clip cartridge with which it is to be used. Appliers are available in a variety of lengths/tip angles and opens at box lock for easy cleaning. *Hemoclip® appliers have been designed for exclusive use with Hemoclip® ligating clips.*
